

Scope of Information Disclosure

According to the Bank of Thailand's guideline in the supervision of capital for commercial banks based on Basel III enforced at full consolidation, the Financial Group is required to maintain the minimum capital requirement corresponding to more complicated risk assessment methods for better risk measurement and embracing other relevant aspects of the Financial Group's encountered risks. The Financial Group is required to disclose both quantitative and qualitative data. Regarding quantitative disclosure, the data as of 31 December 2022 and the latest disclosure of the Financial Group shall be compared.

The disclosure report covers information at both the Bank level (Solo Basis) and the Group level (Full Consolidation Basis). There are 4 companies in the Group consisting of;

- 1. ICBC (Thai) Public Company Limited engaged in commercial banking business (as the parent company)
- 2. ICBC (Thai) Leasing Company Limited engaged in hire purchase, financial lease and factoring business
- 3. ICBC (Thai) Insurance Broker Company Limited engaged in life and non-life insurance brokers
- 4. Sky High LI Leasing Designated Activity Company Limited engaged in hire purchase business

The financial statement reports for capital adequacy consideration under the guidelines on consolidated supervision and the public disclosure of the consolidated financial statement reports have no difference.

Besides the regulation mentioned above, the Bank of Thailand further requires the Financial Group to disclose other key relevant information regarding the capital to be easily accessible and to engender the transparency of the Financial Group's risks and capital information as follows.

Key Prudential Metrics

Liquidity coverage ratio under liquidity stress scenario

| | Average value for the four quarter ¹⁷ | | |
|--|--|--------|--|
| | 2022 | 2021 | |
| | Unit : million Baht | | |
| Total High-quality liquid assets (Total HQLA) | 68,556 | 88,239 | |
| Total net cash outflows within the 30-day period | 43,405 | 59,206 | |
| Liquidity coverage ratio (LCR) $^{2'}$ | 158% | 149% | |
| | | | |

^{1/} Average of month-end value in the quarter

^{2/} The LCR is computed as an average ratio of month-end LCR in the quarter. This may not be equal to an LCR computed with the average value of HQLA and net cash outflows within the 30-day period

Key Financial Ratio

The Bank's key financial ratio as of 31 December 2022 and 2021 were as follows.

| | The Bank | | |
|--|---------------------|--------|--|
| | 2022 | 2021 | |
| | Unit : million Baht | | |
| Total High-quality liquid assets (Total HQLA) | 71,559 | 89,667 | |
| Total net cash outflows within the 30-day period | 45,195 | 65,082 | |
| Liquidity coverage ratio (LCR) | 158% | | |
| Net stable funding ratio (NFSR) | 124% | 127% | |

The Bank has been complied with TFRS9 and shall set up the credit impairment by using the Expected credit loss method. All amount of previous allowance for doubtful accounts are recognized to be the Expected credit loss so there is no the excess allowance for doubtful account from the previous year for reversal. In order that Bank assesses the expected credit losses, models are developed based on historical repayment, default information and other information indicating default risk behavior.

In case the models cannot capture the risk, the management overlay principle, covering industry, model and other risks will be applied.

Capital structure

The Financial Group and the Bank's capital as of 31 December 2022 and as of 30 June 2022 are composed of the following data.

| | The Financial Group | | |
|---|----------------------|--------------|--|
| | 31 December 2022 | 30 June 2022 | |

Capital Adequacy

The objective of capital management policy for the Financial Group and the Bank is to maintain an adequate level of capital to support growth strategies under the risk appetite.

In compliance with the BOT's supervisory review process guidelines, the Bank's capital management process assesses the overall risk and capital adequacy under the Internal Capital Adequacy Assessment Process (ICAAP) which covers on the significant risk assessments in order that the Financial Group and the Bank can effectively manage their risks and have an adequate level of capital for the Bank's and the Financial Group's business under normal and stress circumstance.

The Financial Group shall establish the policy to maintain the regulatory capital in compliance with the methodologies and conditions as specified by the Bank of Thailand. To assess the capital adequacy for different types of risk, the Financial Group utilizes the approaches corresponding to complexity of transactions and size of the Financial Group as follows:

- Credit Risk Standardized Approach
- Market Risk Standardized Approach
- Operational Risk Basic Indicator Approach

Under the principles of Basel III, the BOT requires that commercial banks registered in Thailand and their financial groups must maintain three minimum capital adequacy ratios as follows:

- Common Equity Tier 1 Capital adequacy ratio of no less than 4.50 percent
- Tier 1 Capital adequacy ratio of no less than 6.00 percent
- Total Capital adequacy ratio of no less than 8.50 percent

ICBC 😰 ธนาคารไอซีบีซี กาย

The aforementioned minimum ratios have not been included the Capital Conservation Buffer of 2.50 percent yet. Therefore, the Financial Group and the Bank must maintain the capital adequacy ratio including the Conservation Buffer as follows:

- Common Equity Tier 1 Capital adequacy ratio of more than 7.00 percent
- Tier 1 Capital adequacy ratio of more than 8.50 percent
- Total Capital adequacy ratio of more than 11.00 percent

The minimum capital requirement

According to the Basel III guideline in supervision of capital, the Financial Group and the Bank have to maintain the minimum capital corresponding to the following type of risk :

1. Credit risk capital requirement

Based on the Standardized Approach, the minimum capital requirements of The Financial Group and The Bank's capital are classified by type of assets with the data as of 31 December 2022 and as of 30 June 2022 were as follows:

| | The Financial Group | |
|--|---------------------|--------------|
| | 31 December 2022 | 30 June 2022 |
| Minimum Credit Risk Capital Requirement | Unit: thousa | nd Baht |
| Performing Loans | | |
| - Claims on Sovereigns and Central Bank and claims on non-Central Government Public | | |
| Sector Entities (PSEs) which are treated as Claims on Sovereigns and Central Bank., | - | 450 |
| - Claims on Financial Institutions and claims on Non- central Government Public Sector | | |
| Entities (PSEs) which are treated as Claims on Financial Institutions. | 1,790,319 | 2,588,235 |
| - Claims on Corporates and claims on Non-Central Government Public Sector Entities | | |
| (PSEs) which are treated as Claims on Corporates. | 12,104,986 | 12,492,314 |
| - Claims in the Retails Portfolio | 3,128,410 | 3,133,575 |
| - Residential Mortgage Loans | 305 | 346 |
| - Other assets | 191,672 | 216,790 |
| Non-performing Loans | 67,714 | 75,931 |
| Total Minimum Credit Risk Capital Requirement | 17,283,406 | 18,507,641 |

| | The Bank | | |
|--|---------------------|--------------|--|
| | 31 December 2022 | 30 June 2022 | |
| | Unit: thousand Baht | | |
| Minimum Credit Risk Capital Requirement | | | |
| Performing Loans | | | |
| - Claims on Sovereigns and Central Bank and claims on non-Central Government Public | | | |
| Sector Entities (PSEs) which are treated as Claims on Sovereigns and Central Bank., | - | 450 | |
| - Claims on Financial Institutions and claims on Non- central Government Public Sector | | | |
| Entities (PSEs) which are treated as Claims on Financial Institutions. | 1,774,413 | 2,576,875 | |
| - Claims on Corporates and claims on Non-Central Government Public Sector Entities | | | |
| (PSEs) which are treated as Claims on Corporates. | 11,544,682 | 11,904,100 | |
| - Claims in the Retails Portfolio | 38,359 | 39,094 | |
| - Residential Mortgage Loans | 305 | 346 | |
| - Other assets | 464,519 | 473,841 | |
| Non-performing Loans | 27,310 | 34,336 | |
| Total Minimum Credit Risk Capital Requirement | 13,849,588 | 15,029,042 | |

2. Market Risk Capital Requirement

For the Trading Book, The Financial Group and the Bank use the Standardized Approach for capital calculation. The market risk capital requirement for The Financial Group and the Bank as of 31 December 2022 and 30 June 2022 as follows.

| | The Financial Group | | The Bank | |
|---------------------------------|---------------------|---------|--------------|----------|
| | 31 December | 30 June | 31 December | 30 June |
| Capital Requirement | 2022 | 2022 | 2022 | 2022 |
| | Unit: thousand Baht | | Unit: thousa | und Baht |
| Market Risk Capital Requirement | 37,428 | 33,166 | 30,595 | 23,512 |

3. Operational Risk Capital Requirement

The Financial group and the Bank adopt the Basic Indicator Approach for capital requirement calculation of operational risk as of 31 December 2022 and as of 30 June 2022 as follows.

| | The Financial Group | | The Bank | |
|--------------------------------------|---------------------|-----------|-------------|----------|
| | 31 December | 30 June | 31 December | 30 June |
| Minimum Capital Requirement | 2022 | 2022 | 2022 | 2022 |
| | Unit: thou | sand Baht | Unit: thous | and Baht |
| Operational Risk Capital Requirement | 971,141 | 926,698 | 604,077 | 566,458 |

ICBC 🔢 ธนาคารไอซีบีซี เกย

4. Capital Adequacy Ratio

The Financial Group and the Bank calculated risk weight assets under Basel III guideline for 3 types of risk, The Capital Adequacy Ratio were as follows

| | The Financi | BOT | |
|-------------------------------------|------------------|----------------|-------------|
| Capital Adequacy Ratio | 31 December 2022 | 30 June 2022 | Requirement |
| | | Unit : Percent | |
| Tier 1 capital to risk assets | 17.1 | 15.6 | 8.5 |
| Common Equity Tier 1 to risk assets | 17.1 | 15.6 | 7 |
| Tier 2 capital to risk assets | 3.5 | 3.3 | - |
| Total capital to risk assets | 20.6 | 18.9 | 11 |

| | The B | BOT | |
|-------------------------------------|--------------------------------------|----------------|-------------|
| Capital Adequacy Ratio | 31 December 2022 30 June 202 | | Requirement |
| | | Unit : Percent | |
| Tier 1 capital to risk assets | 19.1 | 17.4 | 8.5 |
| Common Equity Tier 1 to risk assets | 19.1 | 17.4 | 7 |
| Tier 2 capital to risk assets | 4.1 | 3.9 | - |
| Total capital to risk assets | 23.2 | 21.3 | 11 |

Credit Risk Policies

The Financial Group has established the credit risk policies and credit policies as the guidelines for credit approvals consideration to be within the portfolio risk tolerance of The Financial Group and the bank. The credit risk management policies comprise the lending to related parties policy, individual and group facility limits, the list of prohibited businesses lending, specific businesses lending and sectorial lending limits including other relevant policies to credit approval processes which are in line with the Bank of Thailand's regulations so that The Financial Group has appropriate control of credit risk and sufficient credit and portfolio risk management. The policies also incorporate the processes of credit risk assessment, monitoring, controlling and capital adequacy assessment as appropriate.

Definition of default and impairment of assets

The Financial Group has established the policy to define the default for the impairment of loan consideration whereby the incurrence of default corresponding to the overdue of either principal or interest of over 90 days after the due date or any loans qualitatively classified as non - performing.

Guideline for setting general provision and specific provision

The Group recognized expected credit loss which complied with TFRS9 and Bank of Thailand notification: Guideline on Asset Classification and Provisioning of Financial Institutions. An expected credit loss represents the present value of expected cash shortfalls over the residual term of a financial asset, undrawn commitment or financial guarantee. A cash shortfall is the difference between the cash flows that are due in accordance with the contractual terms of the instrument and the cash flows that are expected to be received over the contractual life of the instrument.

The estimation of expected cash shortfalls on collateralized financial instruments reflects the expected amount and timing of cash flow from foreclosure of the collateral less the costs of obtaining and selling the collateral. In addition, the Group also recognized the specific an expected credit loss by individual as follows:

- The Financial Group has set the additional allowance by considering the Expected loss for "Stage 1" and "Stage 2".
- 2. In case that The Financial Group has considered the credit approval, extension of facility or restructuring and found that it is possible that the loans cannot be repaid in both principal and interest according to the contract, the credit risk department will consider classification and propose the additional specific allowance for each individual loan.
- For some industry sectors, countries or portfolios which have higher risk profiles, the Credit Risk Department may recommend increases in the allowances for debtors in those sectors, countries or portfolios.
- 4. The Financial Group may set additional allowances upon the recommendations of Industrial and Commercial Bank of China Limited, the parent company, the BOT or the Bank's management, internal auditors, and external auditors.
- 5. Since the difficulties to receive recovery from enforcement of machinery, the Bank shall not use the machinery placed as collateral as a deductible.

Credit Risk Exposures Classified by Credit Risk Weighted Asset Calculation Methods

1. The list of the External Credit Rating Institutions (ECAI) that The Financial Group chooses to determine the risk weight for the borrowers in each type of the assets is as follows:

• Sovereigns, provincial organizations, governmental entities, state enterprises, securities companies which the Bank of Thailand assigns the rating equal to loans to financial institutions are based on 3 ECAIs including Fitch Ratings, Moody's Investor Services and Standard and Poor's Rating Services.

• Corporate borrowers.

Since 1 January 2022 onwards, The Financial Group chooses to determine the risk weight for the borrowers by considering its credit rating from 5 ECAIs including Fitch Rating, Fitch Thailand Rating, Moody's Investor Services, TRIS rating and Standard and Poor's Rating Services.

As of 31 December 2021: The Financial Group chooses to determine the risk weight of 100% for every corporate borrowers without considering its credit rating from the ECAI since the number of the Bank's current customers rated by the ECAI is not high and most of them have the risk weight of 100%, therefore, assigning all corporate borrowers at the risk weight of 100% for the credit risk capital calculation would not much different from the method of using the credit rating from ECAI.

2. The process of assigning the ECAI credit rating to the borrowers.

• For sovereigns, provincial organizations, governmental entities, state enterprises, securities companies that the Bank of Thailand treats their risk weight as the financial institutions. The Financial Group designates the risk weights in compliance with the Bank of Thailand's guidelines corresponding to the type of borrowers.

1/ After multiplying by the credit conversion factor (CCF)

1. Credit Risk Mitigation by Standardized Approach

The Financial Group has established the policy in mitigating the credit risk of financial statement items for the purposes of capital maintenance and credit risk reduction in accordance with the Bank of Thailand's guidelines in the credit risk mitigation by Standardized Approach where The Financial Group has formulated the guidelines and working process on the document, contracts, or legal terms relating to the credit risk mitigation as follows:

- Shall maintain the document or contract relating to such credit risk mitigation obligating to and enforceable to all relevant parties.
- Shall have the processes and systems in considering the legal terms.
- Shall revise all relevant documents and contracts to be continuously enforceable
- Shall have the processes in controlling other potential risks that are caused by employing the credit risk mitigation.

ICBC 🔢 ธนาคารไอซีบีซี เทย

- Shall comply with the Bank of Thailand's guideline in information disclosure according to Pillar III
- Shall consider the contractual maturities and remaining maturities in the credit risk mitigation process to ensure that there would be no maturity mismatch between the exposures and the credit risk mitigation .

The credit risk mitigation by Simple Approach consists of:

- Risk mitigation by the eligible financial collaterals
- Risk mitigation by the on-balance sheet netting
- Risk mitigation by guarantee and credit derivatives

The Financial Group has formulated the policy for the credit risk mitigation by means of on-balance sheet netting as follows.

- Shall have legal consideration regarding the enforceable on-balance netting contract in specifying which assets and liabilities are eligible in netting at any time.
- Shall be capable of monitoring and controlling the risks from maturity mismatch between the assets and liabilities for netting or roll-off risk.
- Shall be capable of monitoring and controlling the exposures on the netting basis.

2. Policies and processes for collateral management and assessment

Under the credit risk mitigation policy, the eligible financial collateral including those traded in the exchange and over-thecounter markets are subject to valuation.

3. Major types of collaterals of The Financial Group

The main eligible financial collateral is deposit at bank; however, other eligible financial collaterals for credit risk mitigation before risk weighted assets and credit risk capital calculation include:

- 1. Cash, deposits at bank or deposit receipts issued by banks
- 2. Gold bullions
- 3. Debt instrument issued by the issuers rated by the ECAIs as follows:
 - Short-term debt instruments with the rating better or equal to A-3/P-3, sovereigns, central banks, provincial organizations, governmental entities, and state enterprises which the supervisory authority treats the risk weight as that of sovereigns and the rating of equivalent to BB- or higher.
 - Other issuers, e.g. financial institutions, securities companies, corporate, provincial organizations, governmental entities, and state enterprises which the supervisory authority treats the risk weight as that of financial institutions and the rating of equivalent to BBB- or higher.
 - Short-term debt instrument with rating better or equivalent to A-3/P-3
- 4. Non-rated by ECAIs debt instruments with all characteristics as follows:
 - Issuers are financial institutions and
 - Listed in acceptable exchange bond market and
 - Senior debt and other debt instruments issued by The Financial Group with rating better or equivalent to BBB- or A-3/P-3 and the same seniority as that with no rating
 - No objective evidence for The Financial Group to revise the rating to below BBB-or A-3/P-3

ICBC 😰 ธนาคารไอซีบีซี เกม

- 5. Equity instruments including the convertible bonds listed in the main stock exchange.
- 6. Unit trust invested in the eligible financial collaterals and marked to market on a daily basis

4. Main types of guarantors and protection sellers of credit derivative

The major current guarantors of The Financial Group are the Ministry of Finance mainly guaranteeing the state enterprise bond. Other guarantors and the protection sellers can be reckoned in the credit risk mitigation before risk weighted assets and credit risk capital calculations under the Credit Risk Mitigation Policy are:

- Sovereign, Multilateral Development Banks (MDBs), provincial organizations, and governmental entities
- State enterprises, financial institutions, and securities companies with the risk weight below that of the guaranteed counterparties Corporate including the parent and subsidiary companies and the joint guarantee of credit risk must be rated higher or assigned with the risk weight lower than the guaranteed counterparties. The credit guarantors must be rated higher or equal to A- or A3.

5. Concentration of credit and market risk in each type of collaterals, guarantors, protection sellers of the credit derivative for the credit risk mitigation

Most credit risk mitigation by the eligible financial collaterals method is in forms of deposits at bank for reducing the credit risk in general loans, while the credit risk mitigation by guarantee of loan method is in forms of guarantee by the Ministry of Finance on the investment in debt instruments.

The Financial Group and the bank have the outstanding collateralized exposures in each type of asset by Standardized Approach classified by the types of collaterals as of 31 December 2022 and 2021 as follows:

| | The Financial Group | |

Market risk in Trading Book

Market risk means the risks potentially from the changes in market prices or values caused by interest rates, exchange rates, equity and commodity price movements impacting net interest income and capital of financial institutions. Such changes have an impact through both general market risk and specific risk. The transactions with the market risk can be categorized as follows:

1. Transactions in the Trading Book include the positions of financial instruments and commodities with the intents of trading or hedging of other positions in the trading book and all types of financial derivatives with non-hedging intents for Banking Book positions. The transactions must be non-obligated in buying, selling or hedging with the holding period of no longer than 6 months.

2. Transactions in the Banking Book include the positions of financial instruments or other types of transactions with the intents of not for trading or the financial instrument with the initial intention to hold for long period of time or hold to maturity. The holding period must be at least 1 month.

The Financial Group has the Market Risk Management Policy to identify, measure, control and monitor the market risk both in Trading Book and the interest rate in Banking Book so as to efficiently manage the risk and comply with the Bank of Thailand's guideline in market risk management. The relevant market risks include:

ICBC 🔢 ธนาคารไอซีบีซี แกย

- 1. Interest Rate Risk is the risk stemming from changes in interest rates resulting in the changes of values of assets, liabilities and off-balance sheet items especially in the medium- to long-term.
- FX Risk is the risk stemming from negative impact caused by the changes of FX aggregate positions which may incur from the FX transactions for trading, partly hedging for Trade Finance customers, partly hedging for investment in FCY debentures, etc.
- Price Risk is the risk stemming from the change in prices of equity or equity derivatives in the Proprietary Portfolio.

In managing market risk, the Portfolio Risk Management Department under Risk Management Division is responsible for monitoring and controlling any potential market risk incurred by the operation of Treasury Division where the Asset and Liability Committee (ALCO) determines the market risk limits which are approved by the Executive Committee (EXCOM). ALCO meeting is organized at least once a month to review the market risk and formulate the risk management strategies under changes in financial market environment. For the Market Risk Management Policy, the Portfolio Risk Management Department shall propose through the Group Risk Committee while the policy shall be approved by the Board of Directors (BOD).

The measurement of market risk in the Trading Book embraces all types of market risk including interest rate risk, FX risk, and price risk. Besides, The Financial Group assesses the risk and capital adequacy on a regular basis both in normal and crisis situations by means of assessing the Trading Book position at least on a daily basis based on marking to market, marking to model or other appropriate prices. The gain/loss from each transaction in the Trading Book is subject to the stop loss limits. Moreover, The Financial Group conducts the stress test on the Trading book for all relevant risks while stress test assumptions shall be revised to be in line with economic and financial market condition and to encompass the possibility of negative impacts on the net interest income and The Financial Group's capital on a regular basis.

The risk management tools include control limits, which curb the maximum amounts that the Treasury Division can invest, and stop loss limits, restraining the maximum loss acceptable to The Financial Group in consistent with the Business plan, strategies of The Financial Group and economic, political, financial market conditions domestically and internationally.

ICBC 🔢 ธนาคารไอซีบีซี กาย

The Financial Group has calculated the market risk capital by using the Standardized Approach which is appropriate to the characteristics of investment portfolio of The Financial Group. The market risk capital requirements as of 31 December 2022 and 2021 were as follows:

| | The Financial Group | | The Ba | nk |
|--|---------------------|-------------|--------------|------------|
| | 31 December | 31 December | 31 December | 31December |
| Market Risk Capital Requirement | 2022 | 2021 | 2022 | 2021 |
| | Unit: thousand Baht | | Unit: thousa | nd Baht |
| Interest Rate Risk | 1,501 | 2,365 | 1,501 | 2,365 |
| Equity Price Risk | - | - | - | - |
| Foreign Exchange Risk | 33,725 | 22,038 | 27,294 | 13,739 |
| Commodity Price Risk | | | | - |
| Market risk capital requirement (BIS 8%) | 35,226 | 24,403 | 28,795 | 16,104 |
| Market risk capital requirement (BIS 8.5%) | 37,428 | 25,928 | 30,595 | 17,111 |

Operational Risk

Operational risk is the risks from damages caused by the lack of good corporate governance in the organization and the appropriate controls. It may relate to the internal processes, human, working systems, or external events and have the negative impact on the interest income and The Financial Group's capital.

The policy of The Financial Group specifies the guideline to prevent and manage the relevant risks and includes the definitions, objectives, sources of risk, operational risk management principles and operational risk working procedures which encompasses risk identification, assessment, analysis, designation of risk control processes, application of risk controlling and monitoring.

At present, The Financial Group use Basic Indicator Approach (BIA) corresponding to the characteristics and complexity of The Financial Group's business operation.

Equity related exposures

Most of the equities in the Banking Book were obtained from debt restructuring. The Group classified the equity into fair value to OCI and recognized the different amount of fair value into the other comprehensive income and will no longer recognize the profit or loss on selling into profit or loss statement.

The equity in the Banking Book of which were held in the portfolio for long time and shall be at least 1 month, according to The Financial Group's policy in Banking Book. The effect on the financial statement is not strongly affected. Thus, equity risk management in Banking Book has no need to set the investment limit and stop loss limit.

ICBC 🗵 ธนาคารไอซีบีซี กาย

The Financial Group and the Bank have the outstanding equity related exposures in the Banking Book as of 31 December 2022 and 2021 as follows:

| | The Financial Group | |
|--|---------------------|------------------|
| Equity position | 31 December 2022 | 31 December 2021 |
| | Unit: thou | usand Baht |
| 1. Equity related position | | |

| 2. | Gain(Loss) from selling of the equity in this period | 197,455 | 54,896 | |
| 3. | Gain (Loss) from marking to market of FVOCI | 96,603 | 295,743 | |
| 4. | Minimum capital requirement under Standardized Approach | 819,796 | 742,353 | |

Interest rate risk in the Banking Book

The interest rate risk on The Financial Group's balance sheet items are from the mismatch of the repricing periods of assets and liabilities both of the financial statement. Such a difference indicates the level of risk or the magnitude of impact of the change in an interest rate that The Financial Group encounters.

Owing to no trading position in debt instrument, the interest rate risk of The Financial Group mainly comes from the Banking Book where The Financial Group assesses the impact of the interest rates of assets and liabilities through both Net Interest Income (NII), measuring the impact of a change in interest rate on the net interest income in the next 12 months, and Economic Value of Equity (EVE), measuring the impact of a change in interest rate on all assets and liabilities to perceive the impact on the overall portfolio of The Financial Group.

However, The Financial Group has engaged in the interest rate swaps, comprising the swap transactions that receive floating rate and pay fixed and some of the swap transactions that receive fixed and pay floating rates in order to partly hedge the interest rate risk.

The financial group employs repricing Gap Report in measuring and managing the interest rate in the Banking Book in which the control limit has been set at the acceptable level. The Portfolio Risk Management Department is responsible for arranging the gap report and reporting to the relevant sub-committees/committees as well as the Bank of Thailand on a regular basis.

In addition, The Financial Group conducts the stress test on the interest rate risk in the Banking Book based on the assumptions in line with the principle of extreme but plausible scenarios and divided into individual currencies in a quarterly basis in order to report to the Group Risk Committee for consideration and revision of risk management strategy and the action plans to handle any adverse outcomes of the stress tests.

At present, The Financial Group does not have the behavioral adjustments on both assets and liabilities, e.g. behavioral adjustment on prepayment schedule and the rollover of the deposit.

The Repricing Gap report in Banking Book by currency is reported to the Asset and Liabilities Committee on a monthly basis, and a report on interest rate risk to the Bank of Thailand on a quarterly basis.

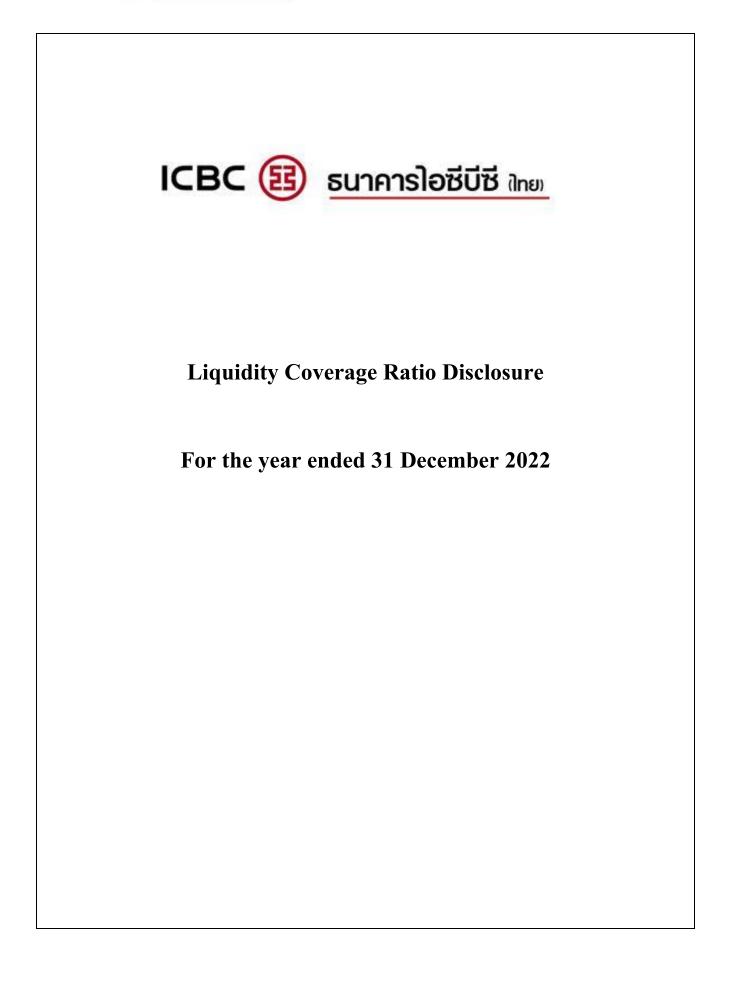

The impacts of a change in interest rate on earnings of The Financial Group and the bank for the years ended 31 December 2022 and 2021 were as follows:

| | The Financial Group | | | |
|---|----------------------|---------|---------------|----------|

Scope of Information Disclosure

Industrial and Commercial Bank of China (Thai) Public Company Limited has maintained the liquidity coverage ratio (LCR ratio) to be in line with BOT regulations. The purpose is to assure that the bank has adequate liquidity position on hand to handle any short-term severe liquidity stress.

Liquidity coverage ratio disclosure (LCR disclosure) is provided the information to shareholder to assess the liquidity risk of the bank and to promote the market discipline. Moreover, it would also enhance transparency in the disclosure of risk information in accordance with internal standards.

However, the bank shall disclose the information at the bank level on a quarterly basis, minimum LCR as specified by the Bank of Thailand, including LCR comparison with the previous quarters.

| | | Unit: Million Baht |
|--|-----------|--------------------|
| | Quarter | Quarter |
| | 4/2022 | 4/2021 |
| | (average) | |
| (1) Total high-quality liquid assets (HQLA) | 68,556 | 88,239 |
| (2) Total net cash outflows within the 30-day period | 43,405 | 59,206 |
| (3) LCR (%) | 158% | 149% |
| Minimum LCR as specified by the Bank of Thailand (%) | 100% | 100% |

1. Liquidity Coverage Ratio: LCR

2. LCR of the preceding quarters (for comparison)

| | Unit : % |
|----------------|----------|
| Quarter 1/2022 | 155% |
| Quarter 2/2022 | 150% |
| Quarter 3/2022 | 142% |
| Quarter 4/2022 | 158% |

ICBC 🗵 ธนาคารไอซีบีซี กาย

As of Quarter 4, 2022, the average LCR was 158% which was higher than the minimum requirement set by the Bank of Thailand at 100%. It was calculated from the average LCR of end of October, November and December 2022 at 146%, 171% and 158% respectively. The LCR is calculated by using 2 factors.

1. High Quality Liquid Assets (HQLA) includes unencumbered high-quality assets with low risk and low volatility which can be converted into cash easily and quickly. These assets should also be liquid in markets during in time of liquidity stress. The value of each type of HQLA is subjected to a range of haircuts and any applicable caps according to the criteria from the Bank of Thailand.

As of Quarter 4, 2022, the average HQLA was 68,556 million Baht (or 88% of Level 1 assets such as Government bond and cash) by calculating from average HQLA as of end of October, November and December 2022.

2. Net Cash Outflow is defined as expected cash outflows within the 30-day period, minus expected cash inflows within the 30day period under liquidity stress scenarios. The expected cash inflows must not exceed 75% of the expected cash outflows.

As of Quarter 4, 2022, the average net cash outflows within the 30-day period was 43,405 million Baht by calculating from average cash outflows as of end of October, November and December 2022. Average cash outflows under the severe liquidity stress scenarios are the deposits and borrowings run-off of customers by using the run-off rates set by the Bank of Thailand, meanwhile, most of the average cash inflows are from the loan repayments from high-quality customers and from the maturing debenture by using the inflow rate set by the Bank of Thailand.

In addition, The Bank also has the monitoring and control processes by setting the liquidity risk limits which have been approved by the Executive Committee. The Bank has set Early Warning Indicator to monitor liquidity risk daily and monthly and also set the Trigger Point in case there are some factors that may cause the increasing in risk level and report to the related departments. Moreover, the bank prepares Liquidity Gap Report and presents to the Asset and Liability Committee (ALCO) on a monthly basis and also prepares the Liquidity Risk Report to the Group Risk Supervision and Internal Committee on a quarterly basis. From the aforementioned reason, it can be concluded that the Bank can manage the liquidity risk and believe that the liquidity is sufficient to cover any future crisis.
