Risk Disclosure :

Risk of Securities Trading:

Investment involves risk and the prices of securities products fluctuate. The prices of securities may move up or down, sometimes dramatically, and may become valueless. It is as likely that loss will be incurred rather than profit made as result of buying and selling investment.

Risk of Margin Trading:

The risk of loss in financing a transaction by deposit of collateral is significant. You may sustain losses in excess of your cash and any other assets deposited as collateral with the licensed or registered person. market conditions may make it impossible to execute alternate trading orders, such as "stop-loss" or "stop-limit" orders. You may be called upon at short notice to make additional margin or interest payments. If the required margin or interest payments are not made within the prescribed time, your collateral may be liquidated without your consent. Moreover, you will remain liable for any resulting deficit in your account and interest charged on your account. You should therefore carefully consider whether such a financing arrangement is suitable in light of your own financial position and investment objectives.

Growth Enterprise Market (GEM) stocks involve a high investment risk. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. GEM stocks may be very volatile and illiquid. You should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors. Current information on GEM stocks may only be found on the internet website operated by The Hong Kong Exchanges and Clearing Limited. GEM Companies are usually not required to issue paid announcements in gazetted newspapers. You should seek independent professional advice if I am/we are uncertain of or have not understood any aspect of this risk disclosure statement or the nature and risks involved in trading of GEM stocks.

The price of the warrants and Callable Bull/Bear Contracts ("CBBC") may move up or down rapidly and investors may sustain a total loss of their investment. Past performance of the underlying asset is not an indicator of future performance. You should ensure that you understand the nature of the warrants and CBBC and carefully study the risk factors set out in the relevant listing documents of the warrants and CBBC and where necessary, seek independent professional advice. Warrants that are not exercised will have no value upon expiry. CBBC has a mandatory call feature and may be terminated early, in such case, (i) in the case of Category N CBBCs, an investor will not receive any residual value and (ii) in the case of Category R CBBCs, the residual value may be zero.

secondary market may not exist for ETFs; changes in the net asset value of the ETFs may deviate from the performance of the tracking index, ETFs may invest in single country and sector; ETFs with tracking index relating to emerging markets may be subject to a greater risk of loss than investments in developed markets; and like all investments, an ETF is subject to the risk of change in policy of the reference market.

Leveraged and inverse products (L&I Products) are derivative products structured as funds. L&I Products are different from conventional ETFs. They do not share the same characteristics and risks. L&I Products are not designed for holding longer than one day, it is for short-term trading or hedging purposes. When L&I Products are held after a period of time, their return may deviate from and may be uncorrelated to the multiple (in the case of leveraged products) or the opposite (in the case of inverse products) of the return of the underlying index. Investors may suffer significant or even total losses. Trading L&I Products involves investment risk and are not intended for all investors. There is no guarantee of repaying the principal amount. Investors should read the relevant offering documents of Leveraged and inverse products and ensure they understand the key product features and related risks before making an investment.

RMB Risk Disclosure:

The Chinese Renminbi is currently a restricted currency. Due to the exchange controls and/or restrictions which may be imposed by the PRC government on the convertibility or utilization of RMB from time to time, there is no guarantee that disruption in the transfer ability, convertibility or liquidity of RMB will not occur. There is thus a likelihood that you may not be able to convert the Chinese Renminbi received into other freely convertible currencies.
