

# Capital Requirement Disclosures Basel III Pillar III For the six-month period ended June 30, 2025

#### **Scope of Information Disclosure**

According to the Bank of Thailand's guideline in the supervision of capital for commercial banks based on Basel III enforced at full consolidation, the Financial Group is required to maintain the minimum capital requirement corresponding to more complicated risk assessment methods for better risk measurement and embracing other relevant aspects of the Financial Group's encountered risks. The Financial Group is required to disclose both quantitative and qualitative data. Regarding quantitative disclosure, the data as of 30 June 2025 and the latest disclosure of the Financial Group shall be compared.

The disclosure report covers information at both the Bank level (Solo Basis) and the Group level (Full Consolidation Basis). There are 4 companies in the Group consisting of;

- 1. ICBC (Thai) Public Company Limited engaged in commercial banking business (as the parent company)
- 2. ICBC (Thai) Leasing Company Limited engaged in hire purchase, financial lease and factoring business
- 3. ICBC (Thai) Insurance Broker Company Limited engaged in life and non-life insurance brokers
- 4. Sky High LI Leasing Designated Activity Company Limited engaged in hire purchase business

The financial statement reports for capital adequacy consideration under the guidelines on consolidated supervision and the public disclosure of the consolidated financial statement reports have no difference.

Besides the regulation mentioned above, the Bank of Thailand further requires the Financial Group to disclose other key relevant information regarding the capital to be easily accessible and to engender the transparency of the Financial Group's risks and capital information as follows.

#### **Capital Adequacy**

The objective of capital management policy for the Financial Group and the Bank is to maintain an adequate level of capital to support growth strategies under the risk appetite.

In compliance with the BOT's supervisory review process guidelines, the Bank's capital management process assesses the overall risk and capital adequacy under the Internal Capital Adequacy Assessment Process (ICAAP) which covers on the significant risk assessments in order that the Financial Group and the Bank can effectively manage their risks and have an adequate level of capital for the Bank's and the Financial Group's business under normal and stress circumstance.

The Financial Group and the Bank shall establish the policy to maintain the regulatory capital in compliance with the methodologies and conditions as specified by the Bank of Thailand. To assess the capital adequacy for different types of risk, the Financial Group utilizes the approaches corresponding to complexity of transactions and size of the Bank and the Financial Group as follows:

Credit Risk
 Market Risk
 Operational Risk
 Standardized Approach
 Basic Indicator Approach

Under the principles of Basel III, the BOT requires that commercial banks registered in Thailand and their Financial Groups must maintain three minimum capital adequacy ratios as follows:

- Common Equity Tier 1 Capital adequacy ratio of no less than 4.50 percent
- Tier 1 Capital adequacy ratio of no less than 6.00 percent
- Total Capital adequacy ratio of no less than 8.50 percent

The aforementioned minimum ratios have not been included the Capital Conservation Buffer of 2.50 percent yet. Therefore, the Financial Group and the Bank must maintain the capital adequacy ratio including the Conservation Buffer as follows:

- Common Equity Tier 1 Capital adequacy ratio of more than 7.00 percent
- Tier 1 Capital adequacy ratio of more than 8.50 percent
- Total Capital adequacy ratio of more than 11.00 percent

#### The minimum capital requirement

According to the Basel III guideline in supervision of capital, the Financial Group and the Bank maintained the capital corresponding to each type of risk as of 30 June 2025 and 31 December 2024 as follows.

#### 1. Credit risk capital requirement

Liquidity Coverage Ratio Disclosure
For the six-month period ended June 30, 2025

#### **Scope of Information Disclosure**

Industrial and Commercial Bank of China (Thai) Public Company Limited has maintained the liquidity coverage ratio (LCR ratio) to be in line with BOT regulations. The purpose is to assure that the bank has adequate liquidity position on hand to handle any short-term severe liquidity stress.

Liquidity coverage ratio disclosure (LCR disclosure) is provided the information to shareholder to assess the liquidity risk of the bank and to promote the market discipline. Moreover, it would also enhance transparency in the disclosure of risk information in accordance with internal standards.

However, the bank shall disclose the information at the bank level on a quarterly basis, minimum LCR as specified by the Bank of Thailand, including LCR comparison with the previous quarters.

#### 1. Liquidity Coverage Ratio: LCR

Unit: million Baht

	Quarter	Quarter
	2/2025	2/2024
	(average)	(average)
(1) Total high-quality liquid assets (HQLA)	48,016	48,716
(2) Total net cash outflows within the 30-day period	31,864	35,283
(3) LCR (%)	151	139
Minimum LCR as specified by the Bank of Thailand (%)	100	100

#### 2. LCR of the preceding quarters (for comparison)

Unit: Percent

	2025	2024
	(Average)	(Average)
Quarter 1	144	153
Quarter 2	151	139

As of Quarter 2, 2025, the average LCR was 151% which was higher than the minimum requirement set by the Bank of Thailand at 100%. It was calculated from the average LCR of end of April, May and June 2025 at 146%, 160% and 146% respectively. The LCR is calculated by using 2 factors.

1. High Quality Liquid Assets (HQLA) includes unencumbered high-quality assets with low risk and low volatility which can be converted into cash easily and quickly. These assets should also be liquid in markets during in time of liquidity stress. The value of each type of HQLA is subjected to a range of haircuts and any applicable caps according to the criteria from the Bank of Thailand.

As of Quarter 2, 2025, the average HQLA was 48,016 million Baht (or 81% of Level 1 assets such as Government bond and cash) by calculating from average HQLA as of end of April, May and June 2025.

2. Net Cash Outflow is defined as expected cash outflows within the 30-day period, minus expected cash inflows within the 30-day period under liquidity stress scenarios. The expected cash inflows must not exceed 75% of the expected cash outflows

As of Quarter 2, 2025, the average net cash outflows within the 30-day period was 31,864 million Baht by calculating from average cash outflows as of end of April, May and June 2025. Average cash outflows under the severe liquidity stress scenarios are the deposits and borrowings run-off of customers by using the run-off rates set by the Bank of Thailand, meanwhile, most of the average cash inflows are from the loan repayments from high-quality customers and from the maturing debenture by using the inflow rate set by the Bank of Thailand.

In addition, The Bank also has the monitoring and control processes by setting the liquidity risk limits which have been approved by the Executive Committee. The Bank has set Early Warning Indicator to monitor liquidity risk daily and monthly and also set the Trigger Point in case there are some factors that may cause the increasing in risk level and report to the related departments. Moreover, the bank prepares Liquidity Gap Report and presents to the Asset and Liability Committee (ALCO) on a monthly basis and also prepares the Liquidity Risk Report to the Group Risk Supervision and Internal Committee on a quarterly basis. From the aforementioned reason, it can be concluded that the Bank can manage the liquidity risk and believe that the liquidity is sufficient to cover any future crisis.
