How you can get your money out early

The Notes cannot be redeemed before their maturity date unless there is an event of default in respect of the Notes (see section 4 of the Product Disclosure Statement (Key Features of the Notes) for further details).

ICBC NZ does not intend to quote these Notes on a market licensed in New Zealand and there is no other established market for trading them. This means that you may not be able to sell your Notes before the end of their term.

How the Notes rank for repayment

If ICBC NZ goes into liquidation:

- You will be repaid only **after** ICBC NZ's secured creditors and creditors preferred by law (for example, Inland Revenue).
- You will be repaid **at the same time and to the same extent** as all other unsecured unsubordinated creditors of ICBC NZ (including other holders).
- You will be repaid **before** ICBC NZ's subordinated creditors (if any) and shareholders.

You should also read section 4 of the Product Disclosure Statement (Key Features of the Notes).

No security

The Notes are unsecured.

Key risks affecting this investment

Investments in debt securities have risks. A key risk is that ICBC NZ does not meet its commitments to repay you or pay you interest (credit risk). Section 5 of the Product Disclosure Statement (Risks of Investing) discusses the main factors that give rise to the risk. You should consider if the credit risk of these debt securities is suitable for you.

The interest rate for these Notes should also reflect the degree of credit risk. In general, higher returns are demanded by investors from businesses with higher risk of defaulting on their commitments. You need to decide whether the offer is fair. ICBC NZ considers that the most significant risk factors are:

- ICBC NZ is working to establish its core business and expand its range of products and services. The successful development of ICBC NZ's business may be hindered if ICBC NZ is unable to acquire necessary personnel and infrastructure, and compete with other banks.
- As a bank, ICBC NZ is also particularly exposed to credit risk on its customers. Its business could be materially adversely affected if customers do not repay their loans, particularly given its exposure to a relatively small number of significant borrowers, industry sectors and regions while it is building its loan portfolio.

This summary does not cover all of the risks of investing in the Notes. You should also read section 5 of the Product Disclosure Statement (Risks of Investing) and section 4 of the Product Disclosure Statement (Key Features of the Notes).

What is the Notes' credit rating?

A credit rating is an independent opinion of the capability and willingness of an entity to repay its debts (in other words, its creditworthiness). It is not a guarantee that the financial product being offered is a safe investment. A credit rating should be considered alongside all other relevant information when making an investment decision.

The programme under which the Notes are offered has been rated by Standard & Poor's and Moody's Investors Service. Standard & Poor's gives ratings from AAA to C. Moody's gives ratings from Aaa to Ca.

One or more independent credit rating agencies may assign credit ratings to ICBC NZ. The ratings may not reflect the potential impact of all risks and other factors that may affect ICBC NZ. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.
