

## **Position : Credit Management & Data Analyst (Chinese Speaking)**

### **Job Description:**

We are seeking a motivated and detail-oriented professional to join our team in a Credit Management & Data Analyst role. The successful candidate will support credit management functions, including data analysis, policy development, and coordination with the Group Headquarters.

### **Key Responsibilities:**

- Conduct credit-related data analysis and generate management reports
- Support the development and optimization of credit policies and procedures
- Liaise with Group Headquarters on credit matters and regular reporting
- Assist in monitoring portfolio performance and risk indicators
- Utilize BI tools to visualize and interpret data for decision-making
- Support ad-hoc projects related to credit risk management

### **Qualifications:**

- Bachelor's degree or above in Finance, Economics, Accounting, IT or related fields
- Prior experience in credit or banking is preferred (fresh candidates with strong analytical skills are also welcome)
- Chinese or Thai candidates with strong Chinese listening and writing skills
- Proficiency in English or Thai (both preferred)
- Strong analytical and problem-solving skills
- Familiarity with BI & AI tools, knowledge of SQL is preferred
