, where C_{ni} is the appraised value of the securities n in ruble or currency equivalent as of the end of the corresponding (i^{th}) calendar day of the billing period;

$K_{\text{руб} n}$ is the currency rate of the appraised value of the securities in the Russian rubles set by the Bank of Russia for the last calendar date of the billing period, according to the official website of the Bank of Russia. For the Russian rubles, the exchange rate is taken equal to 1;

N – number of calendar days in the billing period;

M – number of different issues (issue-grade securities) or pieces (non-issue-grade securities) recorded on the securities account at least one (1) day during the billing period.

Estimated value of securities is determined as the product of the number of securities at the end of the relevant calendar day of the billing month on the denomination of the securities.

In the absence of information on the par value of the securities, the appraised value is determined based on the market value of the securities according to Thompson Reuters

information system. The appraised value of the securities being determined is expressed in Russian rubles.

In case of settlements in foreign currency, the appraised value of the securities is converted into the Russian rubles at the rate set by the Bank of Russia as of the date of settlement.
